19|47 ARCHIVE

The Partition of India and Pakistan in 1947 was a major 20th century event that affected millions of lives and played a key role in shaping the world in which we live today, both culturally and geopolitically.

Nearly two million lost their lives and 15 million people were displaced, making it the largest mass migration.

The 1947 Partition Archive is a grassroots non-profit organization dedicated to preserving the fast disappearing memory of Partition by

capturing and preserving the people's history through crowd sourced oral history collection.

This is a Digital Archiving available for SPRING 2019. We are considering applicants within the next two weeks and are eager to find the right candidates from UC Santa Cruz.

Our internships are designed for students to gain field experience working directly with a mentor, while supporting our mission of preserving history

and culture.

The students may also be eligible to receive college credit for the duration of the internships.
